

LAM 2 IR

INFRARED LASER AIMER / ILLUMINATOR

Display

The LAM 2 IR provides the utility and operational effectiveness of an IR laser aimer and variable spot scene illuminator. With a quick release M1913 mount, the LAM 2 IR is amongst the lightest aimers in its class.

The LAM 2 IR is a single channel IR laser aimer designed to reach out to 1,000m. For night operations, this simple, extremely lightweight device is the right choice for professional operators demanding unrivalled performance and reliability. The unit is constructed of high strength aluminum and can withstand rigors of tactical life on virtually any weapon platform.

Infrared Laser Aimer	LAM 2 IR
Eye safety	IIIb
Distance, high / low (m)	2,000 / 200
Beam divergence, FWHM (mrad)	0.3
Spot size @ 100m (mm)	30
Wavelength (nm)	845 ±15
Infrared Laser Illuminator	
Eye safety	IIIb
Distance, high / low (m)	2000
Beam divergence, FWHM (mrad)	1 - 105
Spot size @ 100m, min divergence / max divergence (cm)	10 -1,050
Wavelength (nm)	845 ±15
Ballistics	
Windage adjustment step (mrad)	0.5
Windage adjustment range (mrad)	40
Elevation adjustment step (mrad)	0.5
Elevation adjustment range (mrad)	40
Retention after 1,000 shots (mrad)	±0.5
Mechanics, Electronics & Environmental	
Dimensions (mm)	122x81x41
Weight without batteries (g)	300
Shock resistance (G)	300
Quick release	✓
Battery type	CR 123
Battery life, high / low (hours)	8 / 16
Operating temperature range (°C)	-50 to +55
Storage temperature range (°C)	-50 to +55
Waterproofing	IP67
